The SGS Financial Need Assessment Form must be completed and supporting documents provided when being nominated for need-based awards. Please enter all amounts in Canadian dollars (CAD) using the posted exchange rate at the time of application.

### Expected Expenses

The SGS Financial Need Assessment section serves to calculate your expected resources and expenses for the upcoming academic year (2020-21). The amounts in Column C will need to be calculated based on 12 months, for which you will be registered in the upcoming academic year.

Financial need is normally demonstrated when a negative or very small positive balance (under \$500) appears in the "TOTAL NEED" field on page 2 of the application (e.g., "Total Expected Expenses" is higher than "Total Expected Resources"). Showing a large positive balance in the "TOTAL NEED" field will normally not be considered a demonstration of financial need, unless extenuating circumstances are also reported (supporting documentation must be submitted).

### Living Expenses

Choose which living situation applies to you (no housing costs or with housing costs) and fill in the appropriate information. Do not fill out both sections.

Example #1: A single student who will be registered for 12 months, does not have children and is living in his/her parent's home should:

- Choose "Single/Separated/Divorced" and use the amount under the column "No housing costs"
- Calculate the amount for Column C ( $\$560 \times 12 = \$6720$ )

Example #2: A student who will be registered for 12 months, has a partner and 2 children under the age of 12 paying rent should:

- Choose "Partnered" and use the amount under the column "Has housing costs"
- Calculate the amount for Column C ( $\$2509 \times 12 = \$30,108$ )
- Enter "2" under "Number of dependents aged 0-12" to account for the **two** children
- Enter "2" in Column A " $\$590 \times \underline{\quad}$ "
- Calculate the amount for Column C ( $\$590 \times 2 = \$1180$ ;  $\$1180 \times 12 = \$14,160$ )

### Academic Expenses

As tuition for the upcoming year will not be posted until July, enter your fees for the current academic year as an estimate. The total cost of tuition and other fees for most full-time PhD students in the academic year 2019-20 was \$7,850.90.

Review the Tuition Fees Schedules at <https://studentaccount.utoronto.ca/> for detailed information.

Include the total cost of books, photocopying, supplies, equipment, thesis binding, etc. for the upcoming year. Provide reasonable academic related expenses.

### Other

Include other necessary expenses you expect to incur (e.g. extended daily commuting costs, prescribed medication not covered by insurance). Supporting documentation (e.g. receipts from current year) must be provided for each item or the amount(s) will be automatically removed from consideration.

### Food, Household Supplies, Clothing, Transportation, Phone & Internet (do not include)

These costs are already calculated and included within the "Monthly Allowable Amounts" in Column A. The "Monthly Allowable Amounts" are based on allowable claims determined by the Ontario government.

### Expected Resources

#### Government Student Loans/Aid

If you are planning to apply for government student loans from your home country for the upcoming academic year, enter an estimated amount for the upcoming year. Canadian citizens and permanent residents are expected to apply for government student loans from their home province.

#### Available student line-of-credit / financial institution loan

Only include the amount currently available to you through your student line-of-credit or bank loan.

### **Graduate funding**

Students in doctoral-stream programs must declare the total amount of the minimum funding commitment they expect to receive in the upcoming academic year. Amounts for the most recent year are available on the [SGS website](#).

### **Awards**

Include awards/scholarships/fellowships, etc., that have been offered to you and that you have accepted to receive in the upcoming academic year (U of T Fellowships should only be included in the “Total amount of graduate funding” field, as they are part of your program’s funding commitment). If you have not been offered any awards for the upcoming year, enter “0”.

### **Other employment income**

Include expected employment income that is outside of your funding commitment (e.g. work-study, off-campus employment, paid internships).

### **Funds or Support from family member(s)**

Enter any funds or payments provided as support by family or friends, including gifts or loans.

### **Partner’s Income**

If you chose the “Partnered” category under “Expected Expenses”, enter 50% of your partner’s net income (after tax deduction). To calculate, determine your partner’s total annual income amount after taxes are deducted, and divide the amount by 2.

### **Savings and Investments**

Include the total amount of savings or investments you have access to (i.e. bank or investment accounts that you can access relatively easily).

### **Financial Resources Supporting Documentation**

To determine whether you are a dependent and need to attach parental/spousal financial and tax statements:

A dependent is defined as a biological/adopted child, spouse, or common-law partner who is in one of the following situations of dependency:

- a) under age 22; or
- b) enrolled continuously at a college, university or other educational institution and dependent substantially on the financial support of the parent, spouse or common-law partner; or
- c) a person with a disability who has been financially supported substantially by his or her parents and who is unable to be self-supporting because of the disability.
